madebyjagdish.space

 Mahisagar, Gujarat (Open to Remote/Relocation)

Motivated DevOps Engineer with hands-on experience in CI/CD pipelines, containerization, cloud deployment, and automated infrastructure monitoring. Proven track record of architecting robust DevSecOps platforms, building automated workflows, and managing reliable, scalable system deployments across diverse Linux environments.

TECHNICAL SKILLS

DevOps & Cloud:	Docker, Kubernetes (Minikube), Terraform, GitHub Actions, Jenkins (Basic), AWS (EC2, S3)
Monitoring & Security:	Prometheus, Grafana, HashiCorp Vault, Trivy Vulnerability Scanner
Scripting & Tools:	Bash Scripting, Python, Git, GitHub Automation
Operating Systems:	Garuda Linux, Debian Linux (4+ years of dedicated hands-on administration experience)

KEY PROJECTS

MahiOpsAI 2.0 — Enterprise DevSecOps Platform

Technologies: Docker, Kubernetes, Terraform, GitHub Actions, HashiCorp Vault, Trivy, Prometheus, Grafana

- Architected and implemented an end-to-end automated DevSecOps infrastructure pipeline using Infrastructure as Code (Terraform).
- Integrated secure secret token management with HashiCorp Vault and image vulnerability scanning layers utilizing Trivy.
- Deployed high-availability microservices over Kubernetes clusters while establishing persistent telemetry dashboards via Prometheus & Grafana.

MahiOpsAI — AI-Powered DevOps Monitoring SaaS

Technologies: Next.js, PostgreSQL, Razorpay, Vercel, AI Engine, Production Telemetry

- Built and operationalized a full-stack production SaaS platform leveraging real-time telemetry metrics to stream AI-powered actionable insights.
- Embedded OAuth mechanisms (Google, GitHub), streamlined automated webhooks, and configured secure Razorpay payment workflows.

MahiCV-AI — AI-Powered SaaS CV Builder

Technologies: Vercel, Render, Groq API, Full-Stack Architecture, Live Preview Engine

- Engineered a highly responsive full-stack CV building platform with real-time markdown preview rendering capabilities.
- Integrated Groq API for immediate context-aware summary generations and professional automated resume keyword scoring logic.

PROFESSIONAL EXPERIENCE

Freelance DevOps & Web Development Engineer

2020 – Present

- Orchestrated production cloud deployments, managing custom domain portfolios, complex DNS zones, and hosting infrastructures (Hostinger, GoDaddy, Razorhost).
- Transitioned legacy web architectures into modernized, infrastructure-as-code deployments utilizing containerization (Docker, Kubernetes).
- Designed enterprise-grade CI/CD deployment pipelines on GitHub Actions, handling continuous regression testing, environment configuration, and strict security logging.

Customer Support Executive

2019 – 2020

Teleperformance Global Pvt. Ltd. (SBI Process)

- Managed multi-channel client inquiries through CRM platforms (iResolve System), consistently maintaining target service-level KPIs (AHT, CSAT, Quality).

EDUCATION

Bachelor of Engineering (Electrical Engineering)

Gujarat Technological University

Cumulative Grade Point Average (CGPA): 7.33 / 10

KEY CORE STRENGTHS

- Deep production debugging and automated shell workflows
- End-to-end pipeline automation & security hardening
- Agile analytical problem solving & continuous learning mindset
